

1955 Packard Clipper Super 4-Door Sedan

This unrestored low mileage Clipper has less than 60,000 original miles. It wears its original Onyx Black paint which still takes on a nice shine. It has its original interior which is in very good condition. The 320 cu. in. 225 b.h.p. V-8 engine is strong and quiet running. The Clipper rides on set of Diamondback radial whitewalls which are smooth rolling, and have much thread remaining.

This Clipper is unique in that it has conventional transmission, suspension, brakes, and steering. In addition, its history is known from the first owner. Very few of these 1955 Clippers came in one body color and fewer in the all black scheme.

If you are looking for a V-8 Clipper without all the troublesome equipment and accessories, but with the luxury and look of a Packard, this is the one for you. A bargain at \$8,000.

The Clipper is in Austin, Texas.
